**Subject:** RE: schedule for "hybrid" cost est. at \$80m

Thanks Anita - the general sequence/concept looks fine to me.

Dave

Attached is the "draft concept plan" KC mentioned in his e-mail earlier today. We can use this to discuss some conceptual questions for formulating

the scenario, such as:

- 1) Does the sequence of activities make sense?
- 2) Do we want to limit ourselves to dollars or days? Some activities will have to be staffed with double-shifts in order to utilize the \$80M/year.
- 3) Once all TSCA material is dredged, what are our finishing steps? Final clean-up passes? Capping with sand? Should these activities be included?
- 4) Others?

When reviewing the attached spreadsheet, keep in mind that costs are rough and for scoping purposes only. The costs will be refined once the concept is formulated.

Anita

Dave,

In talking to Anita, both milestones - the \$80m hybrid cost est by end of Feb and the 2 CAD Cell approach by end of March are doable. Anita will be sending out an email by COB today with a draft concept plan for getting the estimates completed that can be used for further discussions during tomorrow's conference call.

KC
